RECREATION PARKS AND WILDLIFE FOUNDATION

11th ANNUAL REPORT

89-05793/

Alberta
RECREATION AND PARKS

Office of the Minister

Room 107 Legislature Building, Edmonton, Alberta, Canada, T5K 2B6 403/427-3672

The Honourable Dr. David J. Carter
Speaker of the Legislative Assembly
of Alberta

Sir:

The undersigned has the honour to submit herewith the Annual Report of the Recreation, Parks and Wildlife Foundation for the period from April 1, 1987 to March 31, 1988.

Respectfully submitted,

Norm Weiss
Minister
Recreation and Parks

RECREATION, PARKS AND WILDLIFE FOUNDATION

Seventh Floor
Harley Court Building
10045 - 111 Street
Edmonton, Alberta
T5K 1K4
Phone (403) 482-6467

Message From The Chairman
Hon. Norm Weiss
Sir:

I take great pleasure in presenting the Foundation's 11th annual report for the year ended March 31, 1988. Be assured that the Foundation's Board has worked diligently in carrying out its mandate as set out in Chapter 49 of the Statutes of Alberta, 1976.

The funds accrued to the Foundation from Western Canadian Lottery Corporation has greatly enhanced the Foundation's ability to encourage the enrichment of Alberta's Recreation, Parks and Wildlife.

Respectfully submitted,

J. Sherrold Moore
Chairman

MISSION STATEMENT

Give & Take: Our mandate being served.

TABLE OF CONTENTS

Overview 1
Foundation Activities..... 2
New Initiatives 3
Association Enrichment 4
Quarterly Grant Projects..... 5
The Board 13
Financials..... 15
Appendix A 19

1

OVERVIEW

Created by Provincial Legislation in May 1976, the Recreation, Parks and Wildlife Foundation is an autonomous agency which provides individuals and organizations with the opportunity both to donate real or personal property to be used for projects falling into any or all of the three broad categories mentioned above, or to apply for funding of such projects.

The Foundation is thus a giver and taker, we take in donations and give out grants. As an agent of the Crown in the right of Alberta, donations, bequests and gifts to the Foundation usually qualify for the maximum benefit under the Federal Income Tax Act. Since 1979, the Foundation has also been a recipient of a share of the profits generated by Alberta Lotteries. Combine these very special features with the fact that the Foundation uses its gifts to benefit the people of Alberta, both directly and indirectly, and one finds a worthwhile and beneficial entity in the Foundation.

Both aspects of the Recreation, Parks and Wildlife Foundation—receiving gifts and making grants—are very important. The Foundation's stated objective is to provide, to persons and organizations, the opportunity to donate real or personal property to the Foundation to be used for:

(1) the development r maintenance of recreational programs, services and to a lesser extent facilities;
(2) the development or maintenance of parks; and
(3) the management, conservation or preservation of fish and wildlife.

Similarly, the Foundation is empowered to make grants to any individual or organization for projects falling within these objectives. In effect then, it is a catalyst, transforming donations and other revenue into worthwhile projects.

2

FOUNDATION ACTIVITIES

To meet its stated objectives during the 1987-88 fiscal year, the Foundation provided grant assistance in two program areas known as the Quarterly Grant System and the Annual Association Enrichment program. In addition to these two programs, the Foundation staff are preparing to develop three additional programs to commence operation in the 1988-89 fiscal year. These three new initiatives are to become known as Youth in Action; Cooperative Ventures in Parks; and the Leisure Lifestyle Program.

NEW INITIATIVES

With the recent annoucement of additional lottery revenues awarded to the R.P.W. Foundation, three new programs are being developed to commence operation in the 1988-89 fiscal year.

Youth in Action

Youth in Action is to be created in response to the growing number of teens and youth organizations becoming active in recreation, parks and wildlife projects. With this funding program the Foundation hopes to provide assistance to a wide variety of youth and teen interests from drop-in centres and youth action groups to workshops and clinics on youth concerns. This program will also proactively address the area of Youth Leadership Training and Development with possible funding assistance. Applications for funding will be accepted on a quarterly basis much like the current Quarterly Grant System.

Co-operative Ventures in Parks

Due to the ever increasing capability and desire on the part of Albertans to directly assist in the preservation and protection of Alberta's park system, the Cooperative Ventures in Parks program will provide a system in which these donations can easily be made. The Park Ventures fund will have the capability to receive and hold in trust monies, land and other donations from either the public or private sector and to disburse such assets as designated.

Donations accepted and dispersed through the Park Ventures fund will be limited to projects supporting parks which fall under the authority of the Provincial Parks and the Wilderness Areas, Ecological Reserves and Natural Areas Act.

Such projects may include provision of educational, informational or interprative services to park visitors; the provision of recreational opportunities within parks; surveys and studies of natural and cultural history of the park; studies directed at visitor or management issues; and the provision of capital facilities to increase the use and enjoyment of parks.

Leisure Lifestyles

Leisure Lifestyles reflects the high level of importance and commitment that the Foundation will be placing on enhancing Alberta's positive attitudes toward a healthy and active lifestyle. With this funding program the Foundation will be actively soliciting partnership with both the corporate and public sector for programs designed to enlighten, educate and activate Albertans toward a more productive and healthy leisure lifestyle. As well as funding projects which the Foundation will initiate it will also accept applications to assist projects by any interested group with the same purpose in mind. The Foundation strongly believes that improving the lifestyles of Albertans of every age will have a profound affect, both socially and economically, on the preventative health care within the communities of this province.

ASSOCIATION ENRICHMENT

This program is available only on an annual basis to provincially recognized recreation and service associations. The objective of this program is not to duplicate the funding associations currently raise to provide a basic service to their membership, but to enrich the association with assistance for new initiatives. It is hoped that with their new innovative and creative projects the associations will strengthen and grow to offer better recreational opportunities to Albertans.

Currently, 36 provincially recognized associations are registered under this funding program.

List of Associations Recognized by the Recreation, Parks and Wildlife Foundation

Alberta Aerobatics Association	$21,518
Alberta Committee, Air Cadet League of Canada	$15,460
Alpine Club of Canada	$28,500
Alberta Army Cadet League	$25,000
Alberta Free Balloonist Society	$7,253
Alberta Billiards and Snooker Association	$10,000
Boy Scouts of Canada, Alberta Provincial Council	$46,200
Boys' and Girls' Clubs of Alberta	$40,000
Alberta Bridge Players Asociation	$3,220
Alberta Camping Association	$0
Alberta Chess Association	$2,300
Duke of Edinburgh Award in Alberta	$5,125
Alberta Fish and Game Association	$24,000
Girl Guides of Canada Provincial Council	$37,050
Kart Racing	$770
Alberta Hostelling Association	$33,560
Canadian Parks and Wilderness Society	$23,600
Federation of Alberta Naturalists	$8,403
Navy League of Canada	$25,517
Alberta Physical Culture Association	$33,800
Alberta Recreation and Parks Association	$115,200
Federation of Alberta Rock Clubs	$1,500
Red Cross:Water Safety Services	$56,797
Royal Life Saving Society of Canada: Alberta	$57,450
Alberta Scuba Divers Council	$3,500
Alberta Recreation Skating Association	$0
Canadian Ski Patrol System: Alberta	$13,880
Alberta Snowmobile Association	$21,950
Yoga Association of Alberta	$11,425
YMCA, — Alberta Region	$32,500
YWCA, — Alberta Region	$27,090
Alberta Fitness Leadership Certification Association	$69,900
Alberta Be-Fit-For-Life Centres	$199,600
Alberta Wilderness Association	$11,000
Alberta Association of Recreation Facility Personnel	$18,300
Sport Medicine Council of Alberta	$9,000

QUARTERLY GRANT PROJECTS

As its name implies, the Foundation accepts applications on four deadlines each year from any individual, group, municipality or organization, for projects which fall within the categories of recreation, parks or wildlife.

As a result of the 1987-88 call for applications, the Foundation received and reviewed 554 requests for support, totalling $14,787,000. The Foundation awarded funding to 371 of these projects in the amount of $3,031,403.

Highlighted below are some of these projects which depict the ability of the Foundation to assist a wide range of projects beneficial to Albertans. For a complete listing of all quarterly grant applications, see Appendix A.

Wildlife Rescue Ward, Calgary Zoo

The Calgary Zoo's Animal Rescue Program involves neighboring provinces and some states of the U.S. In 1986, because of the value of this service to the Province of Alberta, the Calgary Zoo was awarded the Order of the Bighorn for outstanding contribution to Alberta fish and wildlife heritage.

The zoo has 1400 animals in the resident collection, comprising some 300 species. To maintain a healthy collection a $2.4 million Animal Health Centre and Quarantine Station was built.

An important component of the centre is the Wildlife Rescue Ward, a completely self sufficient unit which meets quarantine regulations and protects the resident collection when in the hospital for treatment.

About 800 animals annually are brought in by wildlife officers and members of the public, a major caseload for the zoo's Veterinary Services department. Costs are fully absorbed by the Cagary Zoo.

The Zoo's success rate is excellent and approximately thirty percent are released back to the wild while some are integrated into the zoo and others may be traded to other zoos. Unfortunately, some must be euthanized due to serious injuries. The zoo also attends to over 100 eagles, hawks and owls and better than fifty percent are released back into the wild after treatment. The Recreation, Parks and Wildlife Foundation agreed to grant $10,000 towards the Rescue Ward to aid the Calgary Zoo to meet its mandate of strengthening wildlife appreciation through specialized assistance.

Program Coordinator for Camp Tamarack

Camp Tamarack, located on the outskirts of Grande Prairie, is a recreation-wilderness camp for disabled people. The camp reached that stage in its development where a full-time staff person was required to help it reach its full potential in serving the needs of guests. Consequently, the Camp Tamarack Association Board of Directors applied to the Recreation, Parks and Wildlife Foundation for assistance.

The idea of developing Tamarack was born in 1976, when Isaac Iselmoe, a pioneer of the Peace Country, left a portion of his estate to benefit the disabled. From those beginnings, the Camp Tamarack Association now has a half-section of land and development includes a lodge complete with washroom and kitchen facilities for 150 people; cabins; a caretaker's residence plus a wash-house.

In 1984, the Camp Tamarack Association agreed with the Alberta Rehabilitation Council for the Disabled (ARCD) to develop and run the summer recreation programs for the disabled. To move to a year-round facility the services of a full time staff person was needed.

Although unable to meet the complete grant request, the Recreation, Parks and Wildlife Foundation authorized a grant of $15,000 to help meet the costs of establishing this new full time position for one year commencing September, 1987.

A "Grizzly" Study

Every year there are instances of humans being mauled by bears, sometimes fatally. To reduce the number of fatal human-grizzly conflicts, research is needed into predicting and mapping grizzly bear habitats.

The RPW Foundation was approached by Robert B. Wielgus, a PH.D candidate with the Department of Forest Science of UBC, for a grant to assist him in such research. Mr. Wielgus was working on predicting grizzly bear habitats especially in the Kananaskis-Bow-Crow Forest region and believed he was on the verge of a major discovery concerning grizzly population and habitat management.

Mr. Wielgus's previous research has shown that male grizzlies use different habitats in the Kananaskis and these habitats can be mapped. He also determined different reproductive classes (eg. adult, subadult, with/without cubs) also "appear" to use different habitats. This knowledge would be invaluable in helping reduce human-grizzly conflicts.

The on-going research would attempt to determine if and why such habitat segregation occurs, and to produce a model that can predict grizzly population dynamics. Such a model would be valuable to the appropriate government departments involved when planning recreational centres in bear country to keep human-grizzly conflicts down to a minimum.

This two year research project related directly to the objectives of the RPW Foundation and the directors were pleased to grant $10,000 to offset a proportion of the costs.

U of A CAPS Programme

Many students are ill-prepared for the challenges and demands involved in the job search and career planning and become discouraged, often ending up as square pegs in round holes.

Graduates must be prepared to sell their skills and abilities in a highly competitive market place. Career and Placement Services is a relatively new facility set up at the U of A dedicated to preparing students for the job search by training, practice and encouragement, and through career counselling and workshops. Prospective employers are invited to participate in workshops to provide added expertise. Career Placement Services is issuing a pilot run of four magazines which focus on opportunities in pharmacy, physical education and recreation, engineering and law. Each magazine will feature relevant articles on self assesment, career planning, resume writing and interview techniques.

One magazine will be entitled "Focus on Physical Education and Recreation", and will target the Recreation field communicating to its readers the challenges, opportunities and expectations of prospective employers. The Recreation, Parks and Wildlife Foundation Board of Directors agreed to award a grant of $1500 towards this unique venture.

Devonian Botanic Garden Projects

Approximately 5km north of the Town of Devon on Highway 60, is the Devonian Botanic Garden, a 190 acre natural area dedicated to the preservation of the flora and fauna within its boundary.

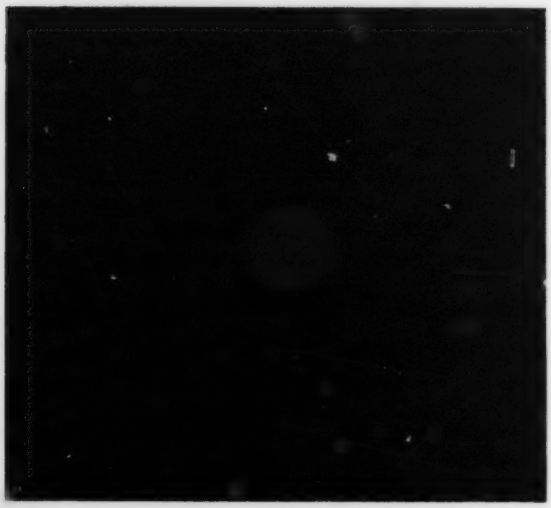
The Botanic Garden operates an education program unique in Alberta which is geared toward adults and children and includes nature day camps, family pond study and family bird study.

The friends of the Devonian Botanic Garden approached the Recreation, Parks and Wildlife Foundation for assistance with the costs of developing and running a children's education program for one year from August 1987 to August 1988. The Foundation granted $15,000 towards this worthy project.

Inglewood Bird Sanctuary

At the far end of 9th Avenue in Calgary's inner city, lies an ornithologist's delight; the Inglewood Bird Sanctuary. To date over 230 bird species, some rare and endangered, together with 270 plant species, have been recorded. Each year thousands of ducks overwinter here.

The sanctuary is bounded by the Bow River and is approximately 80 acres in size. It has been a federally designated sanctuary since 1929 and has the greatest diversity of birds species recorded per area of any urban natural environment park in Alberta.



The Parks and Recreation Department of the City of Calgary centres its city-wide natural history programs out of the sanctuary and offers a wide variety of appropriate courses. In addition they lead numerous nature tours for a variety of groups and organizations as well as area school boards. The sanctuary is open to the general public from dawn to dusk year round. It has been conservatively estimated that upwards of 75,000 people visit the sanctuary annually.

River bank stabilization was urgently required due to erosion caused by the numerous visitors and the preponderance of waterfowl. Calgary Parks and Recreation Department decided to build two viewing decks in the areas where bank stabilization and reclamation are occuring. These decks would give visitors a better view of the waterfowl and an excellent area from which to feed them in the winter. A chain link fence would prevent future bank erosion by the public.

The bird sanctuary is actually in the grounds of the Colonel James Walker house, a designated historic site which has also suffered the ravages of time and tourism. To improve access to the sanctuary, it was planned to pave the entrance driveway and plant approximately 100 new trees. The total cost of all these renovations and upgradings was $44,000. The Foundation agreed to grant $27,500 to enable the bank stabilization and public viewing areas to be completed.

Facility Upgrading at Lessard Lake

For 16 years the Lac Ste Anne Regional Recreation Council has been operating a unique outdoor education centre. Unlike many summer camps, which tend to resemble a first class hostel complete with running water, heating, electricity and ample protection from the elements, the Lessard Lake facility is a natural outdoor learning centre within a rustic setting.

Over the years users have requested different opportunities in keeping with the changing outdoor activities and safer use of the centre. The Council recognizes that as a larger and more diverse group of users utilize the centre, the budget cannot cope with all the user requests.

The Council approached the RPW Foundation for assistance in the upgrading including additional gas lighting and a second gas refrigerator; new shutters on the main lodge plus kitchen equipment and ten additional picnic tables; an overnight open chalet plus a new fire pit and small stoves: and purchase of six new canoes with paddles and life preservers as well as two canoe carriers and a canoe storage shed.

Total cost of improvements was $24,000.

This project fulfilled three criteria:

— development of recreational facilities
— maintenance of Parks
— preservation of fish and wildlife

Confident the council would have no difficulty in raising the rest of the funds, the Foundation Directors approved a grant of $20,000.

Alberta Wildflowers and Phenology

Local botanist, Elisabeth Beaubien, has launched a Phenology survey for Alberta in which she expects to have in excess of 1000 participants from all over the province.

Phenology is the study of biological events and their relationship to seasonal climactic changes. Plants are highly sensitive weather instruments responding to temperature, rainfall, humidity, wind and sunshine; by collecting data over a number of years on flowering times, we can learn what is an average, early or late spring in different parts of the province. Such knowledge will be an important decision making tool in agriculture, horticulture and forestry. For instance, a relationship between phenology and planting dates for optimum harvest could be established.

No other province has such a large scale, well-supported survey in progress and thus Alberta leads the way.

For the survey to be conducted successfully, the volunteers have to be able to familiarize themselves with some of our most common spring and summer blooming wildflowers. Unfortunately there is little published information on our native flowers and this led Elisabeth Beaubien to produce a Wildflower Brochure.

Using coloured photographs by Dr. George Scotter and Halle Flygare (originally published in their book 'Wildflowers of the Canadian Rockies') as well as photographs from Julie Hrapko (Curator of Botany, Provincial Museum) and Derek Johnson of the Canadian Forestry Service, the Wildlife brochure will feature 15 key flowering species of Alberta. It will have a description of the plant together with details of its habitat and flowering dates plus a tear-off data sheet. The brochure will encourage Albertans to participate in the survey which is planned to last for many decades.

A major target group for the brochure will be students especially at the grade 5-6 level. It will help them develop basic concepts of conservation and preservation, one of the primary tenets of our Foundation. Stewardship of our native species and habitats will become important to the children as they see, by their participation in the phenology survey, how the existence of these plants is linked to undisturbed habitats.

The Recreation, Parks and Wildlife Foundation supported this project with a grant of $4,000 for printing the resource brochure, an important part of the survey.

Favorite Poems and Quotations

"It is a great thing to have a great thought, but it is a much finer thing to pass a great thought onto others."

This profound quotation is the first of many compiled by Helen Ridgeway in a booklet entitled "Some Favorite Poems and Quotations." The 64 page book is available from the Alberta Wildlife Park to whom all proceeds from sales will be donated.

Helen Ridgeway, more affectionately known as Aunt Helen to those who visit the Children's Farm petting area at Alberta Wildlife Park, has spent a lifetime in teaching. Originally from Nova Scotia, her teaching experiences have been varied and challenging and have taken her from fishing villages in Nova Scotia, to rural schools on the Prairies, to the mountains of Kentucky.

Helen came to Alberta in 1950 teaching for a year in Stony Plain, thence to the Edmonton Public Board. After "retiring" she spent innumerable hours as a volunteer in Edmonton community schools.

Helen has always been an innovative educator, combining her teaching skills with her great love of wildlife. Young people need to develop their talents and she feels the early experiences of children have a lasting influence on their lives. For that reason she strongly supports the Alberta Wildlife Park as a place where new worlds of enjoyment and interest are available to children, givng them an appreciation of living creatures and our environment.

During her long and illustrious career she has accumulated a large number of favorite poems and quotations, which have found their way into the book.

The Foundation was very pleased to be associated with this unique undertaking and approved a grant of $10,850 to assist in the printing costs.

One of the major tenets of the Recreation, Parks and Wildlife Foundation is the management, conservation or preservation of fish and wildlife.

Two grants the Foundation recently made, will enable development and enhancement of two separate wildlife habitats in central and southern Alberta.

The first grant of $10,000, to W-E-R Engineering Ltd. of Calgary, was used in conjunction with a study they were doing concerning the effects that farm slough consolidation has on wildlife habitats. The second grant totalling $50,000, to Ducks Unlimited was to be used to assist in the purchase and development of Cassils Marsh, near Brooks.

The W-E-R Engineering study is a small portion of an ongoing investgation into On-Farm Water Management being carried out by Alberta Lands, Forestry and Wildlife. The department is concerned with the implications drainage of existing wetlands has on of wildlife and their habitats.

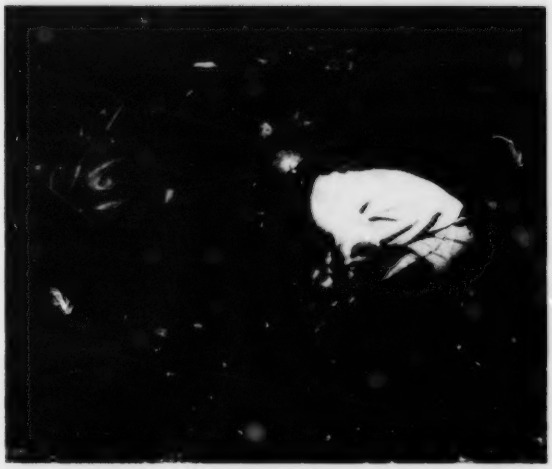
The area being studied is located near Bashaw, 80km southeast of Edmonton on Highway 21. The area has two wetlands joined by a small channel. This channel will be widened and deepened to allow freer flow of surface water between the two wetland ponds. This will reduce flooding losses of nests, eggs and young ducklings.

The northern pond will be dredged deeper to provide a more permanent water area and the dredged material from both the pond and channel used to build three nesting sites and loafing areas for waterfowl giving some immunity from predators.

Each island will be re-seeded with a grass and forb mix capable of withstanding varying periods of immersion underwater. It is also planned to establish shelterbelts around the area by planting various trees and shrubs as well as posting "No Hunting" signs!

The Cassils Marsh is located 12km west of Brooks and within 145km of Calgary. It lies immediately next to the Antelope Creek Habitat Development Area which was purchsed for wildlife purposes in a jointly funded initiative by the Alberta Government, Ducks Unlimited, Wildlife Habitat and the Alberta Fish and Game Association. Cassils MARSH is in a transitional area, between native prairie and irrigation agriculture.

The marsh has been formed as a result of irrigation return flow; the water is routed from irrigation lands to the south and eventually ends up in San Francisco Lake. The resultant marshes are shallow, and located



in a basin of low gradient. Situated as it is, on the edge of an area under irrigation, together with the combination of cereal and forage crop production, wetlands, canal banks, shelterbelts and idle areas, it provides a variety of habitats suitable for several wildlife species, the more notable being waterfowl and upland birds with the occasional deer.

It has been long recognized as a productive waterfowl breeding area as well as providing some of the very best pheasant wintering habitat in southern Alberta. Pheasants can survive Alberta winters providing the wintering habitat has good cover. The prolific cattail stands on Cassils Marsh provide provide excellent winter cover for these birds.

Ducks Unlimited has plans for complete protection and development of the marsh. The key is in water management, since this in turn controls wetland vegetation. The upland portion of the area is overgrazed and significant re-seeding wil have to be undertaken.

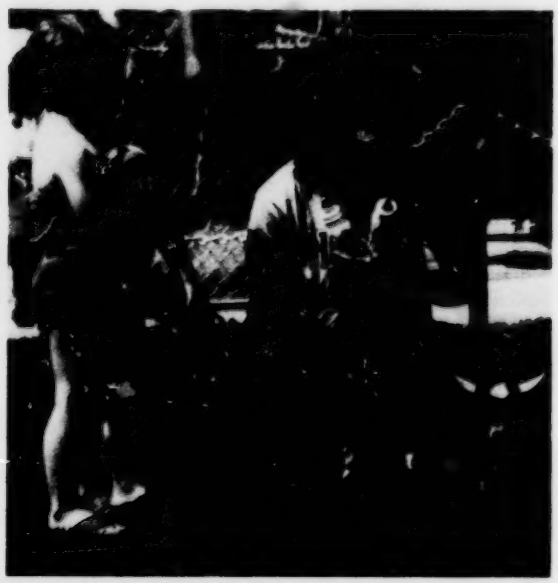
Other habitat development procedures include stabilization and manipulation of water levels with reflooding in parts to recreate wetlands, development of nesting islands and establishment of shelterbelts.

Cassils Marsh will not just be a destination point for pheasant and duck hunters. It will also be used by naturalists, hikers, photographers, school children and senior citizens, leading to greater public awareness of the valuable role these lands play in our society.

The value of Cassils Marsh to wildlife is clear. The protection and development of this important habitat will, in the long term, be a method of preserving wildlife related recreational opportunity intrinsic to the lifestyle of every Albertan.

"Knee High" Nature Manual

Dianne Hayley and her group in Edmonton feel more families should be encouraged to expose their children to a happy outdoor recreational experience. The Hayley group is producing a simple manual geared to the under 8's and called "Knee High Nature".



The main purpose of the manual, which will be available in time for the Christmas, 1988 market, is to lay a foundation of accurate information pertaining to native Alberta wildlife. For example, the children will learn that squirrels in Alberta eat spruce cones and not acorns; that redpolls, not cardinals, visit our bird feeders; that coyotes survive very well near habitation and really do howl near our back doors!

The manual, focusing on animals and plants likely to be found in our province, will be divided into four sections, with subjects to include:

Winter—mice, weasels, deer, elk, moose, winter birds, coyotes, wolves, foxes.

Spring—bunnies, frogs and friends, caterpillars, butterflies, spring birds.

Summer—flowers, snakes, worms, spiders, bees, beaver.

Fall—squirrels, geese, bears, trees, owls.

Each subject will be between 8-12 pages long and include many delightful illustrations by Jo-El Berg of Ardrossan.

The Harley group, which also includes Pat Wishart and Joanne O'Hare both of Edmonton, have given many workshops to preschool teachers as well as the staff at the Janzen Nature Centre in Edmonton. They have individually taught Nature Nursery or Moms and Tots for several years.

By publishing "Knee High Nature", they hope to increase awareness and appreciation of the natural outdoor environment. The Recreation Parks and Wildlife Foundation has granted $8,000 towards publication costs.

Animal Track Guidebook

One problem facing parents of children between the ages of 8 and 13 is keeping them occupied during the winter.

Naturalist and Environmental Educator Joanne Barwise has a solution that does not entail any major expense or knowledge yet provides hours of fun for parent and child alike, is educational and also enhances family leisure.

With fellow naturalist Sally Banks and illustrator Ozlem Boyacioglu, Joanne Barwise has produced a Winter Track Finder for Alberta. This pocket-size booklet identifies animal tracks found throughout Alberta in winter. The booklet will also be of value to young adults, teachers and outdoor leaders.

Books on animal tracking range from hard cover to large soft cover and are difficult to take on an outing. The Winter Track Finder will concentrate solely on approximately 30 mammals active in Alberta during the winter.

A unique concept of the booklet is the means of track identification, taking the reader through a step-by-step, logical sequence that will "key" the tracks immediately. This process of elimination continues until full identification is made.

The booklet can easily be used by elementary students and families with little or no knowledge of natural history.

The Recreation, Parks and Wildlife Foundation granted $7,000 for preparation of text and illustrations.

Peregrine Falcon Breeding Facility

The Peregrine Falcon is an endangered species in Canada, with only ten wild breeding pairs in Alberta. The Canadian Wildlife Service developed a breeding facility at CFB Wainwright to raise young falcons to re-establish wild populations.

The Wainwright District Wildlife Conservation Society initiated a tour of the falcon facility which proved to be a huge success. Beginning at the Town of Wainwright travel information booth, the two hour tour takes in the Camp Wainwright buffalo herd as well as the falcon facility. The tour guide was hired through the federal government STEP program and led 1800 people through the facility.

Of vital importance to the tour was a passenger van since unauthorized private passenger vehicles are strongly discouraged on DND roads within Camp Wainwright.

Another element was advertising to attract tourists. Advertising included roadside signs and major display boards plus colour brochures.

Costs of these items was $22,600. The Recreation, Parks and Wildlife Foundation granted $10,000 towards these costs.

Boat Safety Check Program

In Alberta there are upwards of 160,000 owners and users of boats, ranging from the professional power unit down to the small aluminium skiff.

One important fact all operators need to be aware of is Boating Safety. In 1987, 32% of Alberta drownings were boat related.

For twelve years, the Alberta Boat Safety Check Committee has been dedicated to the prevention of injury, death and property damage from boating accidents. The committee also encourages safe enjoyment of recreational boating through public education and support of enforcement programs.

The Boat Safety Check program is the only integrated one of its kind in Canada involving community service groups, enforcement bodies and government. Since its inception, there has been a reduction in boat related drownings and a significant increase in public compliance with legislated equipment requirements, going from 56% in 1977 to 85% in 1987.

The committee recognizes the need for extending efforts to further public interest in boating safety. An education program has been developed to focus on safety equipment, alcohol and "rules of the road".

In each of three years the safety program emphasizes one of these major concerns. The program is aimed at recreational boaters contacted directly by field staff. It is estmated that during the life of this program some 60,000 people will receive this important educational material through one on one contact. Because the Committee attends various sporting shows, an expected 100,000 additional people annually will view a static display promoting aspects of boating safety.

Estimated cost for the three years is $23,000. The Foundation has no hesitation in granting $5,000 towards the first year program.

Fun for Tots at Vilna

It's good to know that the Recreation, Parks and Wildlife Foundation has been able to share in perpetuating children's fun by granting $5,000 for new apparatus needed by the Village of Vilna for a pre-school playground.

For the last six years the village has organized a summer program and 30-40 children have attended each year. Because this program has proven so successful, and because of an anticipated increase in the number of children wishing to participate, it became obvious facilities were inadequate.

At the last village public meeting new playground equipment was regarded as a high priority item. However, because the population of Vilna is small, local funding was not available, and outside assistance was needed.

The equipment was installed and maintained by the same local volunteers who run the summer programs.

Edmonton Christmas Bird Count 1987

The annual Christmas Bird Count is one of the most significant examples of the importance most North Americans place on wildlife. Last year over 40,000 participants braved the elements to census bird-life. Edmontonians were especially proud of their achievements in fielding the largest urban count ever as well as setting four world records for the largest number of individuals of a species sighted, including the Bohemian Waxwing, Merlin, Black-billed Magpie and the black-capped chickadee.

The data collected by volunteers everywhere is sent to the National Audubon Society who correlate it and publish it yearly as book size issue of American Birds.

In organizing the 1987 Christmas Bird Count, the Edmonton Natural History Club set a goal of involving 1000 people in Edmonton and 1000 people in other parts of Alberta. This produced the largest Christmas Bird Count in North America! In fact a challenge was sent out across Canada and the United States to beat the Edmonton record.

The prime objective was to promote an awareness of birds and their conservation in winter urban environments. It was an important interface between people and wildlife as well as identifying sensitive or threatened wildlife habitat. The data collected also provided information to determine natural fluctuations in populations as well as noncyclic declines such as occurred with the now threatened Loggerhead Shrike.

Perhaps its greatest value was that everyone could take part by walking city streets and parks or watching from home. Participants kept backyard feeders full to attract birds and other wildlife and develop an appreciation for urban wildlife to the benefit of the community.

In view of the multiple benefits to Albertans, both human and feathered, and recognizing the importance of the data to be collected, the Recreation, Parks and Wildlife Foundation provided $4,450 to assist in the costs of administering the count.

Boccie Courts for Edmonton Seniors

Boccie, an Italian bowling game, has quite a following in Edmonton. One player tosses a "jack" ball from one end of a level court to the other. Each team then tries to roll its eight balls closest to the jack ball, alternating shots. Points are awarded for the closest balls. Twelve points constitutes a game, with most matches consisting of two-out-of-three games. The game has its origins in lawn bowls and naturally develops a keen eye and good sense of "balance."

An ardent group of Boccie devotees, the Ital-Canadian Seniors Association, approached the RPW Foundation for a grant to build three Boccie courts in the Giovanni Caboto Park area of Edmonton.

The courts would serve as a focal point of recreational activity and being adjacent to the local Boys' and Girls' Club, could introduce this game to young people.

Some 36-40 people play Boccie during the summer months but Arnaldo Zanon of the Ital-Canadian Seniors said future plans for the new facility include a bubble cover to make it useful year round. This would make it possible for 300 to 500 seniors to be involved.

The Recreation, Parks and Wildlife Foundation is always pleased to be involved with senior members of our community and decided to provide a $5,000 grant toward this project.

THE BOARD

Membership consists of not more than 12 Board members appointed by the Lieutenant Governor in Council for a period of three years. Each member, although employed in a career not usually connected to the Foundation's work, is nominated on the basis of their extensive volunteer time, knowledge and experience with community based recreation, parks or wildlife programs. It is this experience that they draw on when reviewing each application coming to the Foundation and when making an informed decision as to the level of funding to be provided to that project.

As at March 31st, 1988, the following persons were members of the Foundation:

J. Sherrold Moore	Chairman	Calgary
Paul Chomay		Thornhill
Dave Gould		Banff
Christina Jones		McLennan
Murray Lethbridge		Lethbridge
Margaret Lounds		Calgary
Julian Nowicki		Edmonton
Glen Semenchuk		Edmonton
Peggy Strankman		Calgary
James Todd		Red Deer
Ritchie Twa		Wainwright
Maury VanVliet		Spruce Grove

ALBERTA LEGISLATURE

OFFICE OF THE AUDITOR GENERAL

To the Members of The Recreation, Parks and Wildlife Foundation

I have examined the balance sheet of The Recreation, Parks and Wildlife Foundation as at March 31, 1988 and the statement of revenue, expenditure and unexpended funds for the year then ended. My examination was made in accordance with generally accepted auditing standards, and accordingly included such tests and other procedures as I considered necessary in the circumstances, except as explained in the following paragraph.

In common with similar organizations, the Foundation derives revenue from donations the completeness of which is not susceptible of satisfactory audit verification. Accordingly, my verification of this revenue was limited to the amounts recorded in the records of the Foundation and I was not able to determine whether any adjustments might be necessary to donation revenue, excess (deficiency) of revenue over expenditure, assets and unexpended funds.

In my opinion, except for the effect of adjustments, if any, which I might have determined to be necessary had I been able to satisfy myself concerning the completeness of revenue from donations as referred to in the preceding paragraph, these financial statements present fairly the financial position of the Foundation as at March 31, 1988 and the results of its operations and the changes in its financial position for the year then ended in accordance with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

Donald D. Salmon

C.A.
Auditor General

Edmonton, Alberta
August 5, 1988

	1988	1987
ASSETS		
Current:		
Cash	**$3,406,496**	$2,495,697

Unexpended funds at end of year	**$1,056,889**	$1,634,189

Note 1 Authority

The Recreation, Parks and Wildlife Foundation operates under the authority of the Recreation, Parks and Wildlife Foundation Act, Chapter R-9, Revised Statutes of Alberta 1980, as amended.

Note 2 Significant Accounting Policies

Fixed Assets

Fixed assets are recorded at cost less depreciation and amortization. Office furniture and equipment are depreciated on a straight-line basis at rates of 10% and 25% per annum, respectively. Leasehold improvements are amortized over the term of the lease.

Changes in Financial Position

A statement of changes in financial position is not provided as disclosure in these financial statements is considered to be adequate.

Note 3 Fixed Assets

	1988			1987
	Cost	Accumulated Depreciation and Amortization	Net Book Value	Net Book Value
Land	$ 1	$ —	$ 1	$ 1
Office furniture	39,137	12,908	26,229	22,252
Office equipment	30,900	22,407	8,493	8,429
Leasehold improvements	37,812	29,380	8,432	—
	$107,850	$64,695	$43,155	$30,682

Additions to fixed assets during the year totalled $23,708 (1987 - $15,520).

The Foundation received a donation of land for development as a natural park. Under the terms of the bequest, the land must be developed by 1991 or ownership reverts to the estate of the donor. The land, which was appraised by the donor at $288,000, is reflected in these financial statements at a nominal value of $1.

Note 4 Funds Held on Behalf of the Red Deer Foundation

These funds, comprising a $1 million donation together with interest earned thereon, are being held temporarily on behalf of the Red Deer Foundation.

Note 5 Unexpended Funds

Unexpended funds are summarized as follows:

	1988	1987
Expendable funds	$842,625	$1,414,880
Endowment funds	199,124	199,124
Project funds	15,140	20,185
	$1,056,889	$1,634,189

The endowment funds were received from the Alberta Advisory Board on Recreation for the Disabled. Revenue derived from these funds is to be applied to programs previously administered by that organization for a ten year period ending October 1994, after which the funds will become expendable.

Note 6 Grant Expenditures

Grant expenditures are summarized as follows:

	1988	1987
Recreation grants	**$2,158,216**	$1,592,032
Park grants	**171,750**	211,645
Wildlife grants	**701,437**	514,530
Provincial recreation association enrichment grants	**1,040,368**	1,010,520
	$4,071,771	$3,328,727

Note 7 Supplies, Services and Accommodation

Accommodation, basic office furnishings and certain other administrative costs have been borne by the General Revenue Fund and certain outside organizations and are not reflected in these financial statements.

Note 8 Approval of Financial Statements

These financial statements were approved by management.
